

Trajectory Setup

Starting time (YY MM DD HH [mm]): 83 09 01 00

Number of starting locations: 1 ==> Setup starting locations

Total run time (hrs) 60 Direction ☒ Fwrd ☐ Back Top of model (m agl) 10000.0

Vertical Motion Method: 0 = input model data Select

Output (/path/file): ./tdump Browse

Add Meteorology Files Clear Selected Files: 1

oct1618.BIN

What kind of files (ex captex) or where we need to go to input this for current time (real-time) to run model?
